It is noted from the Office Action, claims 1-6 and 14-22 are deemed to be generic. Applicant is electing the species of claims 7-8 for purposes of examination without traverse, which are dependent from generic claims 1-6.

However, the non-elected species of claims 9-10, which are also dependent from and readable on generic claim 6, and include all the limitations of generic claim 6, must also be allowed pending a determination that generic claim 6 is allowable. Similarly, the species of claims 11-13, which are dependent from and include all the limitations of generic claim 6, must likewise be allowed pending a determination that generic claim is allowable. Finally, while claims 14-22 are listed as generic claims in the Office Action of 8/25/05 they too are dependent from generic claim 1. Therefore, should generic claim 1 be found to recite patentable subject matter, then claims 14-22, which include all the limitations from generic claim 1, should also be in condition for allowance.
